

SAVANT SOLUTIONS

Apple®-Based Control, Automation, and Audio/Video Systems

savant
NOW YOU CAN

Apple® at the Heart of Every Savant System

At the core of every Savant project lies an Apple Mac mini®, the Savant Host Controller. This racked device hosts Savant's open standards based software, RacePoint Blueprint™, providing the muscle behind Savant's powerful automation and control, user interface interpretations, system administration, monitoring and more.

Without the need to write a single line of code, Savant's pioneering software, Blueprint, allows for easy configuration and integration of A/V components and automated subsystems. Direct communication from the Mac mini to Savant's entire line of products allow for immediate system response.

Savant Control

Take Your Project to Impressive Heights

Savant's SmartSystems are an expandable and flexible line of intelligent controllers designed for control of automation, audio/video and communication devices.

These award-winning, fully redundant high-bandwidth matrix switchers and controllers provide audio/video switching and processing, video scaling, complete control and automation, customizable digital signage and video overlay features.

A SmartSystem Controller for Every Application

SmartControl, SmartAudio, SmartVideo, SmartMedia and SmartMediaPro Controllers can be configured to meet the demands of any residential and commercial project. SmartSystem Controllers are an integral component of every Savant system.

Savant Sound

Audio Clarity with Seamless Access to Music

Deliver your clients a complete distributed audio solution with high performance speakers and multi-channel amplification.

Music from multiple formats are securely stored, quickly accessed, shared, displayed and selectively distributed throughout any installation. Up to eight independent and simultaneous types of iTunes® media can stream to any area.

Savant Communications

Unmatched Features with an Intuitive Interface

Savant Communications delivers users all of the features of a powerful telephony system, as well as advanced automation and media, with the ease of an iPad® or iPod touch® interface.

This complete Apple-based solution allows for room-to-room communication, whole house paging and integrated intercom features for convenient outbound/inbound domestic and international calls.

Savant Lighting Control

The Perfect Mood Every Time

Create beautiful lighting scenes, automate landscape and security lighting to respond to variable sunset times throughout the year; set up master control in key locations throughout a project, automatically adjust lights for video conferencing or multi-media presentations and more.

Savant Lighting Control, powered by LiteTouch®, delivers powerful control of lighting from any wall mounted keypad, remote control or Apple iOS device.

Energy Management

Monitor Usage Seamlessly

The Savant SmartEnergy Monitoring solution measures and reports energy usage and production in real-time.

Property managers, building maintenance staff and even system owners can now track data on electricity usage and cost by connecting SmartEnergy Monitoring equipment to any electrical panel. An intuitive iPad interface monitors every aspect of electricity usage, from appliances to heating and lighting, which allows users to view and respond to usage remotely.

Designer Control & Interfaces

Powerful Control through Stunning Devices

Savant's full line of designer interfaces deliver simple one-touch control of any device connected to the Savant system. Give your clients seamless control of lighting, climate, security, audio/video and other intelligent sub-systems and technologies through Savant's pioneering and award-winning software Apps, remote controls, keypads and touch screen devices.
